

## **LCWC Recycling Activity 2017**

In 2013 Clark Township residents passed a millage to change the trash collection and the recycling program; the result was the Township Trash and Recycle Center, and the benefits to week-enders and island residents were much appreciated.

Since then the recycling effort has deteriorated. Market conditions have supposedly caused glass, magazines, newspapers, and plastics (type 3-7) to be discontinued.

The contractor running the program has a five year contract, and he is currently allowed to determine which items will be included in the program. He currently is taking magazines and newspapers in other areas he is servicing in the Eastern Upper Peninsula.

The LCWC has decided that recycling will be an additional subject on their agenda during 2017. Hopefully we will be able to restore a number of the items that were on the original list.
